Non-Section 503A

Please amend the non^{published 1/21/99}, so that everyone can have equal access to compound pharmacies. So many of us have to use these compounds because the patented medication gives us such bad reactions. Only a few of these compounding pharmacies exist so we must use mail order. If our doctor prescribes, why should we not be able to get unless we live in a certain state.

Please make sure these medicines are available to all.

Thank you,

Sharon Kelly
